Complete Planning & Execution of Maintenance Turnarounds

From column top to tray bottom, Tiger is all over it.

Leaner, hungrier, with a work-ethic reputation we demonstrate on every project, Tiger Tower Services is a provider of process column installations, resections, internal modifications and integrity repairs. Our vessel services team provides weld overlay, nozzle installations, and maintenance inspections. Although focused on specialized vessel skills, we have proven to be a great cost alternative when supporting general mechanical turnarounds. We're responsive, cost effective and reliable by maintaining our commitment to quality, safety and on-time completion. After completing 250+ projects in the past four years alone, we've given new meaning to what it means to be innovative and responsive.

Scheduled or emergency calls, Tiger Tower people are a different breed.

The culture at Tiger encourages and rewards talent, integrity and contribution. At Tiger, the entire team shares in responsibility and individual commitment plays a big part in what makes us different.

Excellent service—and materials to match.

Tiger supplies all replacement gaskets, bindings and bolting – from battery limit to vessel entry. We also coordinate and procure all replacement trays, packing, distributors, even mist eliminators for all columns and drums. Yet another reason why Tiger continues to tower above the rest.

Single tower or plant wide, our commitment to safety is the same.

No matter how complex the project, it's our policy to conduct a safety analysis, then create and execute a detailed safety plan. Our commitment to our clients: we will not tolerate operations that cannot be conducted safely.

Tiger incorporates the following into every project it undertakes:

- » Scope & Task Planning
- » Daily Cost Control & Reporting
- » Quality Assurance/Quality Control
- » Design Analysis
- » Integrity Analysis
- » Safety Analysis, Creative & Execution of Safety Plan
- » Supply and/or Coordination of Subcontractors
- » Inspection—CWI and API 510 Qualified
